

In the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (currently amended) A method for presenting information from a plurality of information sources, comprising the steps of:

receiving a first information item;

automatically sending said first information item to a first information source as a request for a second information item and to a second information source as a request for a third information item in parallel so that access to the second and third information items is not dependent upon return of one of the second and third information items in order to access the other of the second and third information items;

receiving a said second information item from said first information source;

receiving a said third information item from said second information source; and
automatically displaying predetermined ones of said first, second and third information items.
